

This is the outside view of the Right side version.

It is recommended for first time assembly to mount the Cue Console modules first, then the Hollaender flanges finger tight, then insert the piping before final tightening of the flange nuts, then lastly the set screws.

Hardware incl. in each kit:

- 6 flanges for piping.
- 18 screws 1/4-20 for flanges, with nylok nuts and washers.
- 16 screws 10-32x3/8" for fastening 3 CC2 modules.
- Piping as appropriate.
